

atelier damböck looks back on 30 years of:

- customised design and implementation of trade fair presence
- creative trade fair design
- innovative communication and exhibition construction

Take advantage of our experience from more than 3,000 trade fair and event assignments at national and international venues. In 2010, we worked in 17 countries and more than 70 cities across the globe.

We offer smooth, professional support before, during and after your exhibition.

Member of the Fachverband
Direkte Wirtschaftskommunikation e.V.

Holder of the first internationally recognised seal for sustainable corporate management and working processes.

Munich's atelier damböck

Our services are based around you.

Trade fair design and stand construction

Carefully produced designs, a love of detail and the use of high-quality materials will set your company, your product and your portfolio of services in an impressive light. Contrasting and challenging or simple and elegant, we can design and build you a unique trade fair stand, high-end showroom or exhibition area.

Graphic design

A trade fair stand is more than just the sum of its parts. To us, the graphic design of the interior of your stand is a major part of your trade fair presence and our design approach. To guarantee you a successful exhibition, we can offer you the production of graphics, advertising materials and advertising products, and we can design these as well.

Events and shareholders' meetings

Product launches and corporate events are among the highlights of any corporate calendar. Annual shareholders' meetings are a firm part of our repertoire, as are events and conferences away from exhibition settings and also customer events that bolster your trade fair presence and philosophy. We can provide some of the services involved in this, or we can act as a full service provider.

Climate-neutral exhibition stands

Our www.greenstands.de initiative aims to set the trend and lead the way. We offer eco-friendly solutions individually tailored to your trade fair stand. A climate-neutral stand does not eliminate burdens on the environment entirely, but it does reduce and compensate for them. We look forward to assisting you on the way to creating a climate-neutral trade fair stand.
